

Helpful Tips for CAUTI Reporting for Acute Care Hospital Units Designated as Inpatient Rehabilitation Facilities (IRFs) Participating in the Centers for Medicare and Medicaid Services' IRF Quality Reporting Program

The following steps should be completed prior to the quarterly CMS Reporting Program deadline:

☐ **Verify Your IRF Unit's CMS Certification Number (CCN)**

An accurate CCN is required for IRF units in acute care hospitals participating in the CMS Reporting Program, as this is the ID that will be used to submit CAUTI data to CMS on your behalf. IRF units must have their own CCN entered in NHSN's Location Manager. Instructions can be found at <http://www.cdc.gov/nhsn/PDFs/irf/Updating-IRF-locations-within-NHSN.pdf>. *Please be sure to double- and triple-check this number!*

☐ **Check the Monthly Reporting Plan each month**

When NHSN releases CAUTI data to CMS for those IRF units participating in the CMS Reporting Program, only those months in which the acute care facility included CAUTI in the IRF units in its NHSN monthly reporting plan (MRP) will be included. It is the responsibility of each facility to check their MRPs for compliance with this requirement.

☐ **Enter denominator data for each location and month under surveillance**

Denominator data (i.e., patient days and urinary catheter days) can be entered using the Summary Data > Add option within NHSN and selecting the appropriate Denominator Data type (e.g., ICU/Other).

☐ **If no events have been identified, check "Report No Events" on denominator data form**

IMPORTANT! Facilities must **Report No Events** for those locations and months for which no events of each type under surveillance were identified. If no events have been reported and this box is not checked, your data will not be submitted to CMS. For instructions, please see: <http://www.cdc.gov/nhsn/PDFs/CMS/how-to-report-No-Events-CLAB-CAU.pdf>

☐ **If CAUTI events have been identified, enter the appropriate events**

CAUTI events can be entered by using the Event > Add option within NHSN.

☐ **Use NHSN Analysis Tools to check for accuracy and completion**

The NHSN Analysis Output Option, "Rate Table – CAUTI Data for CMS IRF PPS" was created in order to allow facilities to review those CAUTI data that would be submitted to CMS on their behalf. For more information about this output option, please see **Using the "Rate Table – CAUTI Data for CMS IRF PPS" Output Option** on the NHSN website at <http://www.cdc.gov/nhsn/cms/index.html>.
